

Acoustic solution with attractive design

Our ARTbase is a rectangular, upholstered acoustic column that improves the sound of a room by absorbing reverberation and, above all, disturbing low frequencies. This mobile and compact acoustic column is easy to set up and move around, making it the ideal solution if you don't have space on walls or the ceiling or deliberately don't want to hang anything up.

The acoustic column is a real eye-catcher and can also be used as a pedestal to showcase a work of art or a plant. Thanks to its high absorption capacity of 125 Hz, the ARTbase improves speech intelligibility and enhances the design of the room in a creative way.

Personalised design

The ARTbase stands on a foot of 355 mm x 355 mm, is 1620 mm high and weighs 22.4 kg. The acoustic column is made of aluminium and is available in white RAL 9016 and anthracite black RAL7021. The ARTbase can be covered with practically any fabric, smooth or textured, and the colour can be chosen according to your own wishes. Would you prefer an acoustic column featuring a (photo) print? We will be happy to print the motif of your choice onto a special fabric recycled from PET bottles using sublimation printing. You can choose a motif from an image database or a specific artist or have us use your own photo or digital file. In short, you have endless design possibilities.

Sustainable solution

Incatro wants to contribute to a world with a better quality of life. That's why we respect the environment and place special emphasis on the sustainability of our acoustic panels. This way, we can guarantee the long-term quality and acoustic properties of our products. Our photo prints and single-colour fabrics are easily replaceable, which means you can enjoy your acoustic product for even longer. Since our products are free of harmful substances, they can be disposed of as normal waste. If you so desire, Incatro will also take back your product free of charge.

Since 2018, Incatro has been certified by the Dutch TÜV with the NEN-EN- ISO 14001:2015 certificate (International environmental management standard).

Technical specifications

Acoustic performance : depending on placement in the room (see measurement report)

Fire rating : filling A1, cover fabric B (B - s1 - d1)

Dimensions : 355 mm x 355 mm x 1620 mm (L x W x H) (including foot)

Weight : 22,4 kg

Edge trim : aluminium profile (3 mm thick)

The aluminium profile is available in the colours white RAL 9016 and anthracite-black RAL 7021

Design of the front Fabrics : broad selection of modern single-colour fabrics, both smooth and textured (fabric samples are available on request).

Prints : very high-quality digital prints (sublimation printing)

Installation : On 100 mm high adjustable plastic feet or 45 mm high wheels with brakes
