

Acoustic combi solution

The COMBIpanel is a high-quality acoustic wall panel with an integrated whiteboard and magnetic board that works as a broadband and low-frequency absorber.

The whiteboard is a surface consisting of a white coated metal plate, which is recessed into the 58 mm deep frame. The whiteboard works acoustically in the low frequency range (eg male voices). This whiteboard area can be used for writing and attaching sticky notes and magnetic notes. The soft fabric surface of the COMBIpanel acts as a broadband absorber and can be used to pin notes.

In combination, it is the perfect creative acoustic solution for absorbing reverberation and annoying sound reflections and improving speech intelligibility. This makes them very suitable for workshops, brainstorming sessions or the daily gathering of ideas or sharing messages. Ideal to use as a whiteboard, magnetic board, memo board, bulletin board, organizer board, at home or at your workplace.

Custom-made

The COMBIpanel is available in almost any shape, colour and size. Depending on the dimensions, the COMBIpanel is pre-assembled in our own workshop or assembled on location.

The aluminium profile is available in the colours white, anthracite-black and aluminium-grey.

Personalised design

Our COMBIpanel can be covered with any fabric. You have the choice between both smooth and textured fabrics, as well as between various colours.

Would you prefer a COMBIpanel with a photo print? We would be happy to print a motif of your choice on our specially recycled cover fabric made from PET bottles. Since we work with sublimation printing processes, the colours are printed into the fabric fibre itself so that the reproduced image is razor sharp. You can choose from motifs from our image database, works by a specific artist, your own photo, or your own digital image file.

In short, the design options are unlimited.

Sustainable acoustic solution

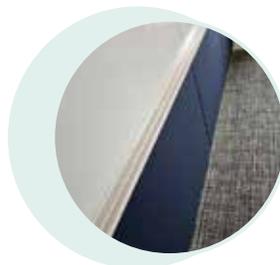

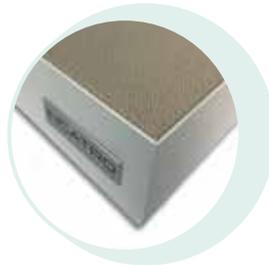

Incatro wants to contribute to a world with a better quality of life. That's why we respect the environment and place special emphasis on the sustainability of our acoustic panels. This way, we can guarantee the long-term quality and acoustic properties of our products. Our photo prints and single-colour fabrics are easily replaceable, which means you can enjoy your acoustic product for even longer. Since our products are free of harmful substances, they can be disposed of as normal waste. If you so desire, Incatro will also take back your product free of charge.

Since 2018, Incatro has been certified by the Dutch TÜV with the NEN-EN- ISO 14001:2015 certificate (International environmental management standard).

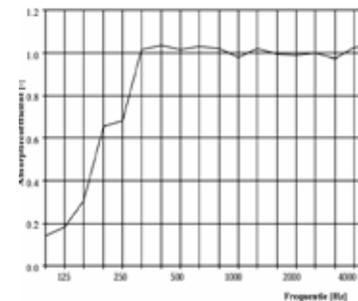

Technical specifications

- Acoustic performance : NRC 0.95 / Alpha W = 1
- Fire rating : filling A1, cover fabric B (B - s1 - d1)
- Weight : 10 kg per m2
- Edge trim : aluminium profile (58 mm thick) with a visible edge of 1.8 mm at the front and a 1 x 1 cm groove at the sides.
- The aluminium profile is available in the colours white RAL 9010 and 9016, anthracite-black RAL 7021 and aluminium-grey RAL 9006.
- The profile can also be covered with fabric on request.
- Design of the front Fabrics : broad selection of modern single-colour fabrics, both smooth and textured (fabric samples are available on request).
- Prints : very high-quality digital prints (sublimation printing)
- Installation : wall- or ceiling-mounted or as a screen in a mobile version or fixed model
